FINANCIAL SYSTEMS & BUSINESS INTELLIGENCE | FINANCE REPORTING AUTOMATION

iamkotwala@gmail.com • +91 98791 92084 • Vadodara / Mumbai, India • [linkedin.com/in/iamkotwala](https://www.linkedin.com/in/iamkotwala)

SUMMARY

I work at the intersection of finance, data, and business systems — building the data architecture that turns fragmented operational information into reliable financial insight. I integrate accounting ERP, CRM, and operational databases, standardize how financial data is structured, and replace manual reporting with automated pipelines in Power Query, SQL, and Power BI. At Regent College London I consolidated four disconnected systems into one standardized process, cutting a recurring 3-day manual build to a ~5-minute automated run, raising reporting accuracy from ~70% to ~99%, and shifting reporting from monthly to weekly. I build data and systems infrastructure — not accounting, tax, or forecasting — and am targeting roles in financial systems, finance transformation, and BI / analytics.

CORE SKILLS

BI & Reporting: Power BI, DAX, Power Query (M), Advanced Excel, data modeling, dashboarding

Data & Databases: SQL, MySQL, data integration, ETL, data governance & standardization

Finance Systems: Sage Intacct (ERP), CRM systems, systems integration, SOP & process design

Finance Domain: revenue analysis, receivables & collections reporting, commission reporting, financial statement analysis, equity / investment research

AI & Automation: Generative AI & LLMs (ChatGPT, Claude), Power BI Copilot, Google NotebookLM, Claude Code; AI-assisted reporting, documentation & automation

Ways of Working: Finance-IT liaison, stakeholder management, team leadership

Foundational: Python, Git, AWS

EXPERIENCE

Regent India Pvt Ltd — Financial Analyst (Acting Financial Systems & BI Lead)

Jun 2025 – Present

Regent College London | Mumbai (Hybrid)

- Consolidated four previously disconnected source systems (accounting ERP, CRM, student records, and spreadsheets) previously combined by hand each month — cutting a ~3-day manual build to a ~5-minute automated run and moving reporting from monthly to weekly.
- Raised reporting accuracy from ~70% to ~99% by standardizing data structures and automating reconciliation, achieving near-zero reconciliation mismatches.
- Designed and built financial data architecture in Power Query (M) and SQL to standardize revenue, receivables, and commission reporting across the organization.
- Built Power BI dashboards and DAX models for revenue, collections, and commission analytics used by ~70 users across Finance, Sales, Admissions, Visa Compliance, and Enrolment.
- Established data governance and standardization — defining how financial data should be structured and which systems integrate — and documented it in SOPs.
- Served as the bridge between Finance, IT, Data Intelligence, and external vendors — translating finance requirements into system solutions — and stepped into an acting Financial Systems & BI Lead capacity during organizational change, leading a team of two direct reports.
- Applied generative-AI tools — LLMs, Power BI Copilot, and Google NotebookLM — to accelerate report development and build video explainers that trained staff on new processes.

AIS Info — Financial Analyst

Nov 2024 – Jun 2025

Vadodara

- Analyzed consumer financial profiles and built Excel-based repayment and settlement models to structure debt-restructuring and asset-recovery plans under U.S. bankruptcy law (Chapter 7 and Chapter 13).
- Partnered with legal professionals, trustees, and clients to assess cases and support compliant recovery decisions.

Independent Study & Certification — Career Development

Sep 2023 – Nov 2024

- Deepened finance, investing, and business-strategy knowledge; explored early-stage startup ideas and conducted independent market research; and earned the AWS Cloud Practitioner (Jan 2024) and NISM Research Analyst (Jun 2024) certifications.

Tata Consultancy Services — System Engineer (Cloud)

Sep 2022 – Sep 2023

Mumbai | Client: Reynolds Consumer Products (USA)

- Automated system administration and reporting with PowerShell across a U.S. enterprise client's cloud and on-premise environment; managed incident resolution, patch deployment (SCCM), and endpoint tooling.

Independent — Equity Investor

Jan 2020 – Present

- Manage a personal long-term equity portfolio, combining top-down macroeconomic analysis with bottom-up fundamental and valuation research; built a 'dry powder' allocation calculator for Indian equity investors using Claude Code.

EDUCATION

Executive Programme in FinTech & Artificial Intelligence — Indian Institute of Management Calcutta (IIM-C) | Expected Feb 2027

MSc, Big Data Analytics (Data Science) — University of Mumbai / Jai Hind College | 2020–2022 | CGPA 9.54 / 10

BCA, Computer Applications — Maharaja Sayajirao University of Baroda | 2017–2020 | CGPA 8.27 / 10
